

NAVID Jaberi

Frontend Engineer
(Vue | React)

Summary

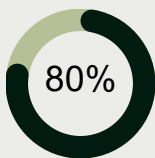

Frontend Developer with 4+ years of hands-on experience building production-grade Vue.js and Nuxt 3 applications — including multi-app SaaS platforms, SEO-driven landing pages, and Progressive Web Apps. Strong in SSR/SSG, state management (Pinia/Vuex), and designing scalable component architectures across multiple connected frontend layers. Core JavaScript/TypeScript foundation transfers well across frameworks — also comfortable building with React and Next.js. Self-taught from the start of my career, with a continued focus on performance optimization, accessibility, and clean, maintainable code. Looking for a mid-level role where I can take ownership of complex frontend systems.

(Interactive portfolio with multi-language support)

Skills:

• Core Stack (Production Experience):

Vue 2/3, Nuxt 3, React, Next.js, Vue Router, React Router, Composition API, Options API, Pinia, Vuex, Context API

• Languages:

JavaScript (ES6+), TypeScript, HTML5, CSS3

• UI & Styling:

Tailwind CSS, Bootstrap, Vuetify, Quasar, Sass, Less

• Architecture & Concepts:

SSR, SSG, SPA, PWA, Component Architecture, Reusable UI Patterns

• API & Data:

RESTful APIs, Axios

• Build Tools:

Vite, Webpack, NPM, Yarn

• Tools & Workflow:

Git, GitLab, Agile (Scrum), Collaborative Development

• Testing & Quality Assurance:

Unit Testing with Jest & Vue Test Utils (Applying automated component and integration tests)

Professional Experience

Front-End Developer - Dongi (Full-Time, Remote) | Nov 2025 – May 2026 (7 mos)

<https://dongi.ir/>

- Built and maintained core features for an internal CRM system used daily by 50+ internal employees to manage operations.
- Developed and shipped multiple SEO-optimized landing pages using Vue 3 and Nuxt 3.
- Implemented semantic HTML and Schema.org structured data to improve organic search visibility and performance.
- Worked closely with backend developers in a fully remote, Agile (Scrum) team environment.

Front-End Developer - Qman(Part-Time) | July 2024 – June 2026 (2 yr)

<https://qman.ir/>

- Led the frontend development of a multi-app SaaS platform for cafes and restaurants to generate digital menus.
- Built and maintained 3 interconnected Nuxt 3 applications (main website, admin panel, and owner dashboard).
- Developed real-time editable menu templates utilizing Nuxt 3, TypeScript, Pinia, and Tailwind CSS as a PWA.
- Designed the client-side data layer to handle complex transformations and API communications with the backend.

Freelance Front-End Developer - Mizooni (Part-Time, Remote) Feb 2024 – Sep 2024 (8 mos)

<https://mizooni.app/>

- Built a women's health PWA from scratch using Nuxt 3, Vuetify, Tailwind CSS, and JS.
- Developed a mobile-first, accessible UI tailored for non-technical users, collaborating with a senior developer.
- Implemented offline caching and PWA installation to ensure reliability on unstable network connections.

Front-End Developer - Asia Salamat (Full-time- on-site) | May 2022 - Jan 2023 (9 mos)

<http://asiasalamat.ir/>

- Built a nurse booking PWA with Nuxt 3, TypeScript, Pinia, and Tailwind.
- Developed responsive, accessible UI flows optimized for elderly and non-technical users.
- Integrated frontend booking flows with backend healthcare scheduling logic.
- Created a scalable Nuxt architecture that remained the team's core foundation.

Intern Front-End developer (Full-time) | Feb 2021 - April 2022 (1 year 3 months)

- Refactored a Vue CLI website to improve component structure and maintainability.
- Developed an admin panel for website content and user data management.
- Built a food ordering site with user auth using Next.js (first React/Next project).
- Collaborated with senior developers on frontend architecture and code reviews.

Featured Projects

Personal Portfolio Website (Next.js & TypeScript)

<https://navidjaberi.vercel.app/>

- Developed a modern, highly interactive personal portfolio utilizing Next.js, TypeScript, and Tailwind CSS to showcase frontend capabilities.
- Implemented multi-language support (English, Persian, Turkish) using next-intl alongside seamless dynamic dark/light mode toggles.
- Integrated advanced, fluid UI animations and micro-interactions leveraging Framer Motion to elevate the overall user experience (UX).
- Deployed the application on Vercel, establishing automated CI/CD pipelines directly linked to the GitHub repository.

Food Ordering Web Application (React & Next.js)

<https://navidjaberi.github.io/next-demo-app/>

- Built a mobile-first, production-ready e-commerce platform for food ordering, featuring dynamic cart management and secure user authentication.
- Utilized React hooks and state management (Context API/Redux) to handle complex UI states, real-time price calculations, and seamless checkout flows.
- Styled the entire application using modern UI patterns with an emphasis on accessibility (a11y) and cross-browser compatibility.

Professional Development

Self-Driven Technical Training & Specialization

- Advanced Framework Architectures: Completed rigorous, industry-recognized training via Udemy (by Maximilian Schwarzmüller) covering full-stack capabilities with React/Next.js (App Router) and production-grade applications with Vue 3/Nuxt 3.
- Strict Type Systems: Deep-dive into advanced TypeScript implementation within frontend architectures to ensure runtime reliability and clean, maintainable codebases (via specialized Udemy coursework by M. Schwarzmüller).
- Automated Testing & QA: Structured training and practical implementation of component and integration testing using Jest and Vue Test Utils to guarantee robust code quality.
